DETAILED ACTION

Drawings

Figure 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to "shifted to that" in the claim language intends to convey.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily

Art Unit: 2828

published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,10,12,14,16-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Ohmi et al (PN 6,331,994).

In figure 18C and 20A Ohmi et al illustrates a gap or slit formed along a lengthwise direction, where electromagnetic waves generate plasma light, as described in column 16 lines 5-23. As disclosed throughout the reference inert gas is supplied orthogonal to the direction of light generation. Figure 26 illustrates the exposure apparatus irradiating the reticle and having a wafer, as described in column 19.

Allowable Subject Matter

Claims 2-5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: None of the prior arts alone or in combination discloses the claimed laser system having the shielding structure as in dependent claim 2 or having the chambers as disclosed in dependent claim 5 or having the opening and gap as disclosed in dependent claim 7.

Claims 8,⁴11,13,15 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior arts alone or in combination discloses the claimed laser system having the structural combination of independent claim 8, where a waveguide has a pair of

Art Unit: 2828

chambers, which are internally supplied with gas, the waveguide having a slit-shape gap in a lengthwise direction allowing the electromagnetic wave to propagate from one chamber to the other and causing plasma light over the entire area along the lengthwise direction of the gap.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
